

LOUD

Elevator Pitch

LOUD in a tweet

LOUD is the new way to listen, classify & manage your music on Soundcloud. It's going to be the best experience to play your tracks...LOUD.

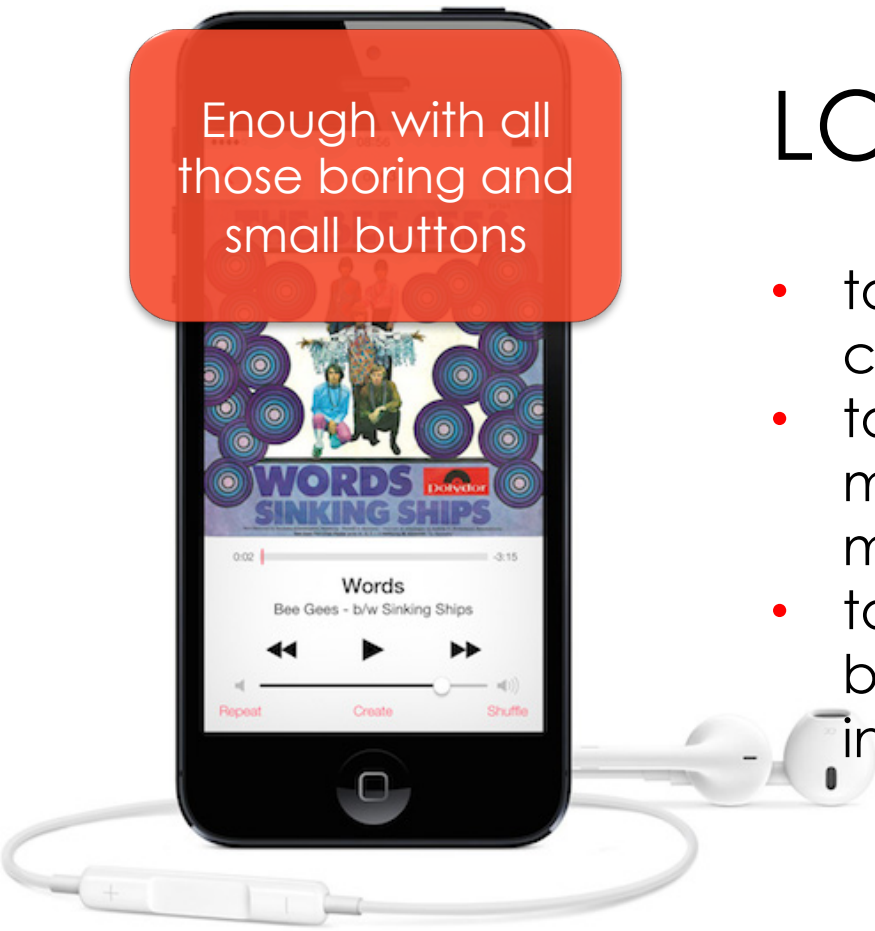

What LOUD does:

Enough with all those boring and small buttons

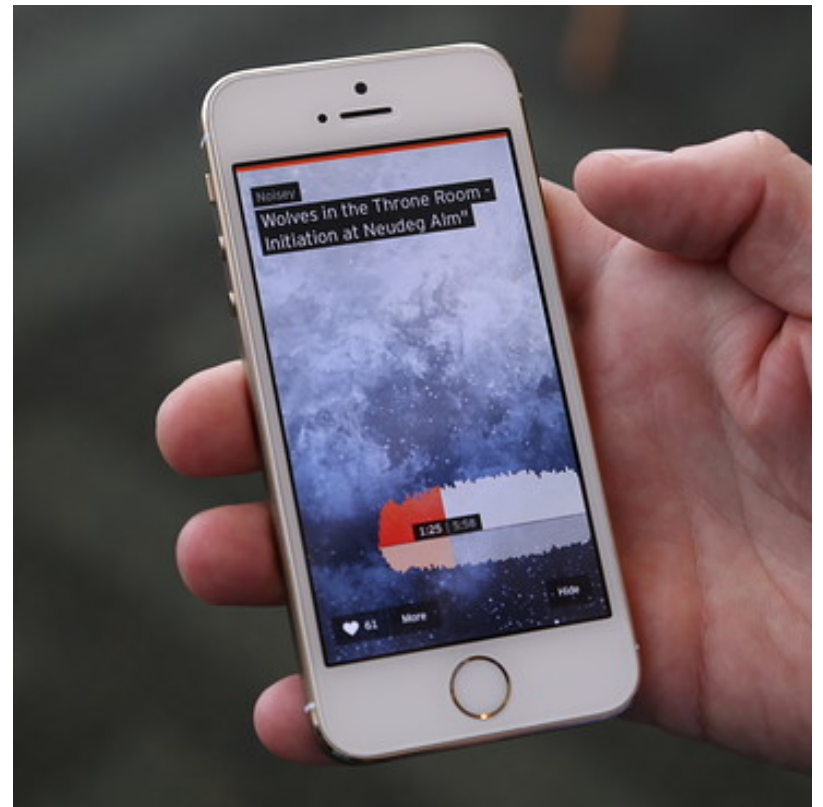

LOUD allows you:

- to use more features, more music context, less social context.
- to manage & classify your whole music on Souncloud in a personal music library in the best way ever.
- to move through tracks with a beautiful and simple gesture-based interface.

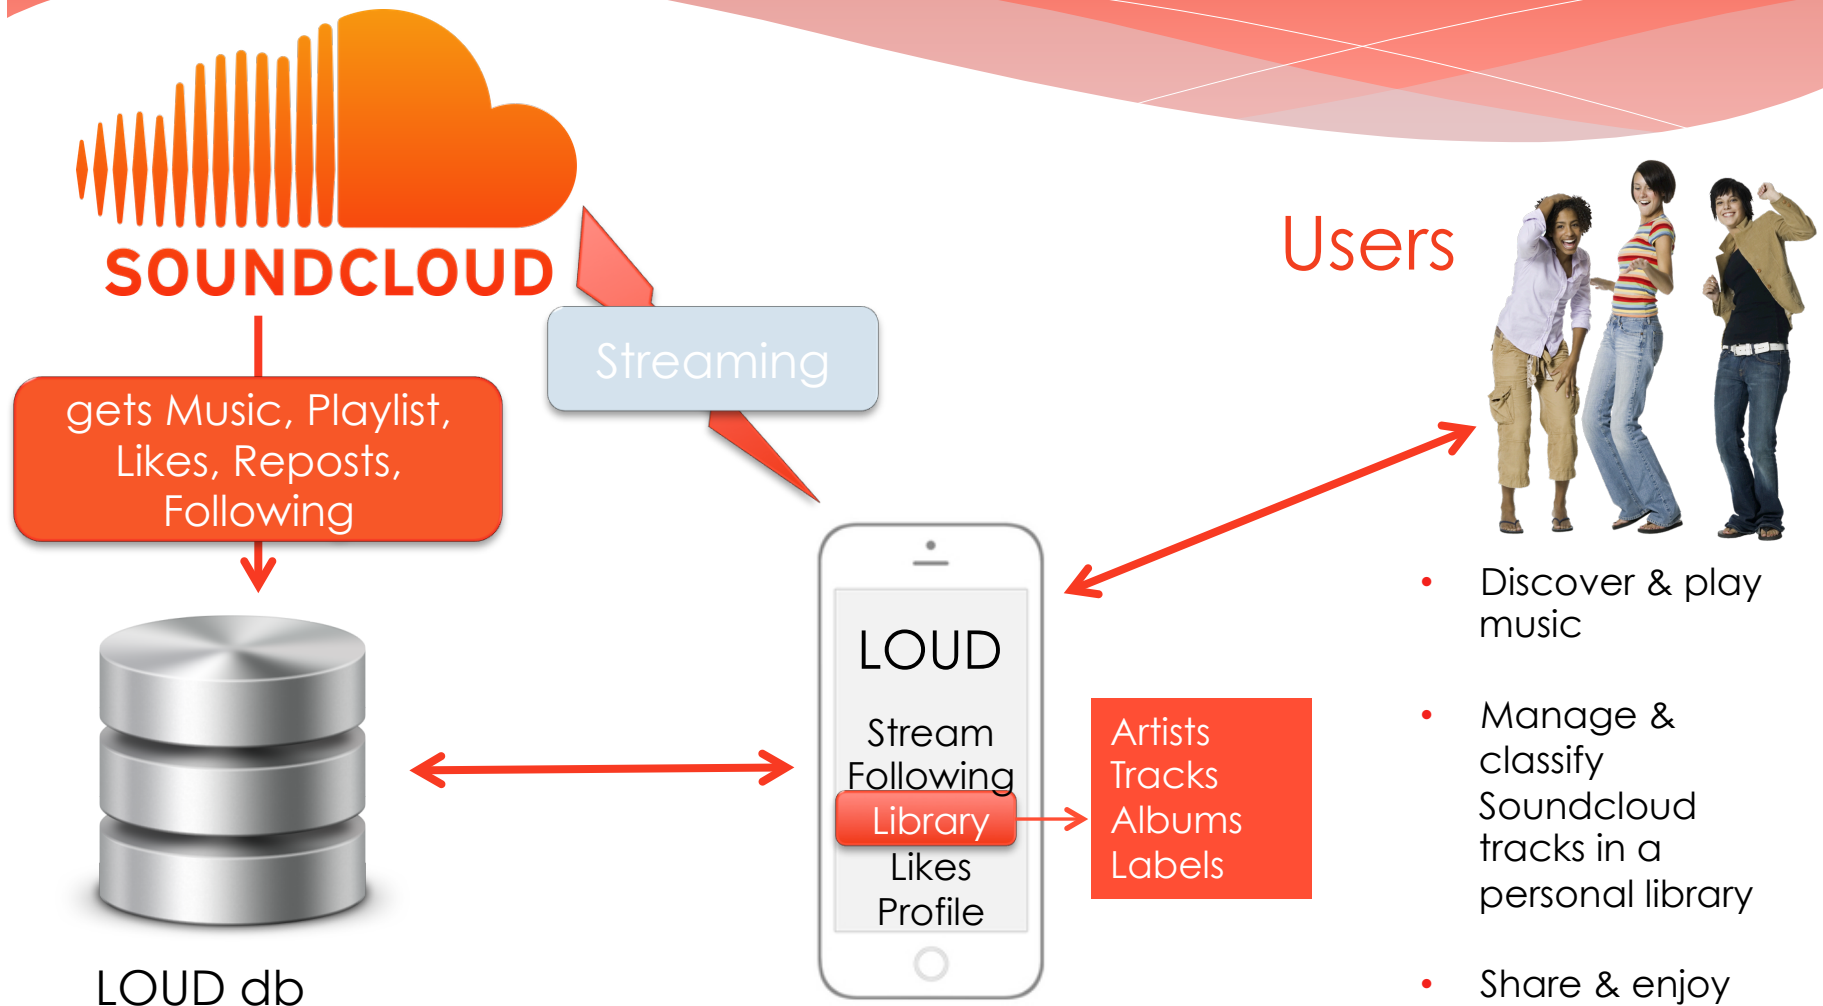

LOUD is for...

..whoever gets an account on **Soundcloud** and enjoys listening to music by streaming.

How does LOUD works

Why LOUD is unique

- More features, more music context, less social context.
- Better user experience with a beautiful gesture-based interface.
- Add tracks in your music library setting following users as artists and following users' playlists as albums. You can even change track's or playlist's artist.
- Hide users' tracks you don't like. They will be ignored.
- Classify your all music by artist, album, label.
- Classify even your liked tracks (by artist).
- Filter your music by single tracks or podcast.
